PROFESSIONAL SUMMARY

Aspiring Software Engineer and UI/UX designer with a strong foundation in Computer Science Engineering. Passionate about building scalable, user-centric web applications with a focus on clean interfaces and backend efficiency. Experienced in Java backend development, React, and design thinking methodologies. Proven track record of managing full-stack projects from conception to deployment.

EDUCATION

Jain Deemed-to-be University

B.Tech in Computer Science and Engineering

Bengaluru, India

2023 – 2027

The Vijay Millennium Senior Secondary School

All India Senior School Certificate Examination (CBSE)

Dharmapuri, India

2022 – 2023

EXPERIENCE

Software & Design Intern

Infotact Solutions

Apr 2025 – Jul 2025

Bengaluru, India

- Designed and implemented intuitive UI/UX workflows for a Virtual AI web platform, resulting in a 20% increase in user engagement metrics.
- Developed user-friendly interfaces for a Fleet Delivery management system, ensuring smooth navigation and operational efficiency for end-users.
- Produced cross-platform wireframes, interactive prototypes, and high-fidelity mockups in Figma, reducing front-end development iterations by 15%.
- Conducted comprehensive user research and usability testing, gathering actionable feedback to refine design solutions and align functionality with back-end requirements.
- Collaborated with cross-functional engineering and product teams to safeguard visual consistency and accessibility standards across multiple digital products.

PROJECTS

MediSync – Clinical Intelligence Platform | *Java, Spring Boot, React, PyTorch*

- Engineered a high-availability backend using Java 17 and Spring Boot 3.2, enforcing PostgreSQL Row-Level Security (RLS) for strict multi-tenant data isolation.
- Created a specialized FastAPI sidecar utilizing PyTorch and MONAI (DenseNet-121) to perform automated diagnostic imaging classification on raw X-ray datasets.
- Integrated Generative AI (Gemini 1.5 Flash, GPT-4o) into a deterministic triage engine, converting complex radiological outputs into simplified, patient-friendly summaries.
- Designed and developed a responsive, high-performance UI using React 18, TailwindCSS, and Framer Motion, achieving a 95+ performance score on Lighthouse.

Smart Transportation & Live Tracking | *HTML, CSS, JavaScript, Firebase*

- Led a 4-member engineering team to design and build a responsive web application for managing digital transit e-passes and live route positioning.
- Deployed a functional tracking environment linking live GPS location streams onto interactive maps, significantly improving real-time visibility for 100+ daily commuters.
- Utilized Firebase to handle real-time database synchronization and authentication, ensuring secure and scalable user data management.

TECHNICAL SKILLS

Languages: Java (Strong OOP knowledge), JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks/Libraries: React 18, Spring Boot 3.2, FastAPI, TailwindCSS, Framer Motion, PyTorch, MONAI

Design & Prototyping: UI/UX Design, Figma, Wireframing, High-Fidelity Prototyping, Design Thinking, Usability Testing

Databases & Tools: PostgreSQL, Firebase, Git/GitHub, Spring Security, RESTful APIs, Agile/Scrum

LANGUAGES & CERTIFICATIONS

Languages: English (Professional), Tamil (Native), Telugu, Kannada, Hindi

Certifications: Programming using Java (Infosys Springboard), Cloud Computing & Software Engineering (IBM), Intro to Graph Theory (UC San Diego).
